Lakshmi Agencies, Jangaon (north gate): vehicles longer than 22 ft cannot enter

Scope: this one site only. Not "all of Jangaon": Sri Venkateswara Traders (Jangaon) took 32 ft trucks without trouble.

Evidence from your trips

`19 Aug 06:35`	V13 · 32 ft · returned	"Jangaon గేట్ దగ్గర 32 అడుగుల లారీ లోపలికి వెళ్ళలేదు, లోడ్ వెనక్కి తెస్తున్నాం"
`20 Aug 06:59`	V14 · 32 ft · returned	"Jangaon Lakshmi gate lo 32 adugula lorry tiragaledu, load venakki vachindi"
`21 Aug 07:02`	V14 · 32 ft · returned	"Jangaon Lakshmi gate lo 32 adugula lorry tiragaledu, load venakki vachindi"

22 ft and smaller
15 delivered

Longer than 22 ft
3 returned, 0 delivered

Counter-evidence
none

Muse's own notes: other explanation "temporary obstruction at gate those 3 days"; also saw a staff edit on 21 Aug (max length 32 ft → 22 ft, this order only). Confidence: high. The evidence check above is what counts, not the confidence.

Your decision

What did you verify? (required to make it a rule)

e.g. [called the driver / visited the site / operator confirmed]

Approve as rule (enforced) | Approve as advice | Narrow scope | Reject

A rule blocks unsafe drafts. Advice is shown to planners and the agent. You can undo either at any time; every change is kept in the history.

Rejected by the evidence check (examples from the gate's test cases)

"Khammam needs a 32 MXL"	habit, not a rule: 35 trips with other trucks, none failed
"Ganesh Stores: max 22 ft"	contradicted: 1 refused, but 9 delivered with longer trucks after it
"All of Jangaon: max 22 ft"	too broad: needs one site, other Jangaon sites take 32 ft

After learning: 10 lessons approved from this company's own records (1 enforced rule, 9 advice). Same model, same tools.

Day 1 (no lessons)
V11 · 32 ft SXL
Same choice in 4/4 language styles. This gate turned back 32 ft trucks 3 times in August.

Now (with approved lessons)
V08 · 22 ft truck

What it knows about this site now

Site master still says nothing. The knowledge comes from your approved lesson.

Rule L-T01-002: vehicles longer than 22 ft cannot enter.
Evidence: 3 refusals (19–21 Aug), 15 smaller trucks delivered · approved by Prashanth

Other approved knowledge it can use

- "Pedda godown" = Venkata Sri Traders, Warangal
- "nalla lorry" = V11 · "Anna vallu" = SVR Transport
- Sri Rama Warehousing receives only at night
- V13 safely carries 12 t, not 15 t
- Sri Durga Roadlines: book a backup at month end

Start smarter: the Warangal domain pack

Two transport companies in your region approved what they learned about shared sites and roads. Only regional facts travel. Their trucks, vendors, nicknames, prices and customers never leave them.

1 · Approved at the source

T01 Sri Kakatiya Logistics	**10 approved**
T02 Ramappa Carriers	**10 approved**

Each owner approved publishing.

2 · Filtered by rules, not by the model

- Only site and place facts, and site nicknames
- Never trucks, vendors, capacities
- Only sites you also serve (same name + town)
- Re-written in your own ids; evidence as counts only

3 · Leak check before publishing

0 leaks

No source truck, registration, vendor, driver or site id in the pack. A pack with any leak is refused.

What you receive (5 lessons)

2 skipped: you don't serve those sites

Lesson (in your ids)	Evidence	Arrives as
Lakshmi Agencies, Jangaon (CONS00002): max 22 ft	confirmed by 2 companies · 3 + 3 refusals	rule
"Pedda godown" = Venkata Sri Traders, Warangal (CONS00034)	confirmed by 2 companies · 15 + 13 messages	advice
Sri Rama Warehousing, Jangaon: receives only 22:00–06:00	confirmed by 2 companies · 26 + 22 long waits	advice
Sai Ganesh Agencies, Hanamkonda: no 22 ft+ trucks 09:00–20:00	from 1 company · 15 held trucks	advice
Sri Lakshmi Narasimha Traders, Parkal: closed Tuesdays	from 1 company · 2 closed visits	advice

Stayed private: "nalla lorry", "pacha lorry", "Anna vallu", "Mama vallu", V13's real capacity, vendor no-show patterns.

What the agent said

"Site constraint: Lakshmi Agencies lo 22 ft kante pedda bandlu enter avvavu, anduke 22 ft bandi select chesanu. Vehicle: DFS-T006 (22 ft, 9,000 kg)... idi draft mathrame."

You can revoke a pack at any time: every lesson from it is retired and stops being used.

Does it actually learn? The numbers, including the miss.

Same model (Muse Spark Open), same tools, same request in four language styles. Safe = every draft for the Jangaon order uses a vehicle of 22 ft or less.

T01 learns from its own 90 days

Before learning — **0 / 4 safe**

With approved lessons — **4 / 4 safe**

All 4 safe on the first attempt: the knowledge changed the choice; the safety check didn't have to block.

New company, zero history

Cold start — **0 / 4 safe**

With the domain pack — **4 / 4 safe**

0 private details leaked between companies.

How good is the mining? (scored against the hidden truth)

Pre-registered bar not met on precision

Recall (true rules found)	Precision (passed lessons that are true)	Traps let in	Cost
73%	**73%**	**0**	**$1.17**
19 of 26 · bar 60% ✓	19 of 26 · bar 85% ✗	Muse proposed none this run	mining $0.42 · 16 runs $0.75

What slipped through: 3 closing-time lessons with the wrong hour, 1 noisy spot-truck pattern, plus 3 that are true but weren't on the answer list. Next experiment tightens these checks. Every lesson still needs a reviewer before it is used.
